

転送が中止されてSnapMirrorが失敗する

https://kb-jp.netapp.com/on-prem/ontap/dp/SnapMirror/SnapMirror-KBs/Snapmirror_fails_with_transfer...

Updated: Sun, 19 Oct 2025 14:50:03 GMT

環境

- Ontap 9
- SnapMirror
- SVMDR

問題

SnapMirrorが失敗し、転送が中止され、転送ステータスが停止します。

SnapMirror前回の転送エラー：

```
Transfer for volume "vol1" failed. Reason: Transfer aborted. Execute
```

```
"snapmirror show -destination-vserver svml-dr last-transfer-error,unhealthy-  
reason -expand" to check if the constituent volumes have encountered  
errors.Scheduled update delayed because another SnapMirror operation is in  
progress
```

SnapMirrorにほとんど進捗がなく、遅延時間が長くなっています：

```
DST::*> snapmirror show -fields ,last-transfer-end-timestamp,lag-time  
-destination-path *:  
source-path destination-path last-transfer-end-timestamp lag-time  
-----  
-----svml:vol1 svml-dr:vol1: 09/30 12:19:05 429:53:49
```

EMS ログから：

```
