宛先ボリュームの移動によりソースSVMの構成の適用に失敗しました

https://kb-japan.netapp.com/on-prem/ontap/dp/SnapMirror/SnapMirror-KBs/Failed_to_apply_the_source_V...

Updated: Mon, 04 May 2026 17:04:07 GMT

環境

- ONTAP 9
- SnapMirror

問題

- SnapMirror初期化/更新/再同期が転送エラーで失敗します：

Failed to apply the source Vserver configuration. Reason: Cannot modify the cloud retrieve policy option of a volume while it is being moved. Check the status of the volume move by running the "volume move show -vserver DestVserver1 -volume DestVoll1" command. Transfer for volume "SourceVoll1" failed. Reason: Destination volume move is in progress. Wait for the volume move operation to finish or abort the volume move operation. To monitor the progress of the volume move, use the "volume move show" command. To abort the volume move operation, use the "volume move abort" command.
